The attached list gives an indication of the suitability of Dantec Composite Hose for various chemicals. It refers to the lining not the cover.

It is only intended as a guide and does not represent that the hose is guaranteed to be suitable for any specific chemical or physical handling of, a particular material.

Our technical staff will be pleased to advise on any specific application.

Hoses listed, and others not shown in our range, may be suitable for temperatures above 100°C/212°F. Please consult Dantec Ltd for advice.

**A:** SUITABLE for use at 100°C/212°F.

**B:** SUITABLE for use at worldwide ambient temperatures

**I:** SUITABLE for INTERMITTENT use only, at worldwide ambient temperatures.

Intermittent use is defined as typical of ship to shore or road tanker transfer operations where the hose is not left full of product after use.

**X:** UNSUITABLE – Do not use.

\*: Polypropylene/Polyethylene couplings should be used.

KEY

A: **SUITABLE** for use at 100°C/212°F.

**B:** **SUITABLE** for use at worldwide ambient

**I:** **SUITABLE** for **INTERMITTENT** use only, at worldwide ambient temperatures. Intermittent use is defined as typical of ship to shore or road tanker transfer operations where the hose is not

tanker transfer operations were left full of product after use.

**X:** **UNSUITABLE** – Do not use.  
**\***: Polypropylene/Polyethylene couplings should be used.
